◦ Adin's Guide

Guided Surgery Drills Kit - Basic

Adin Guide drills kit features Intelligent and logical drill layout, color coding with simple direction indicators for ease of use:

- Procedure advances from left to right.
- Each column is marked and color coded for a specific drill and implant diameter.
- Each row is marked for a specific length.
- Indications arrows for direction of workflow.

The kit also features:

- Pilot drill with a built-in reamer for flattening bone.
- Self-centering drills with built-in stoppers.
- Tissue Punch for cutting through soft tissue.

Guide manufacturing components:

Adin's guide sleeves are available for dental laboratories and other guide manufacturers:

- 5.5mm for standard and wide implants.
- 3.3mm for Narrow implants.
- 2.0 mm for Anchorage Screws.

ActiveFlow™ Irrigation Technology

While irrigation is a necessity in implant surgery, standard surgical guides prevent irrigation from getting into bone and potentially causing the bone to become overheated.

The Adin Guide ActiveFlow™ Irrigation Technology' is innovative and unique design that forces cooling saline through the guide and ensure that irrigation reaches to the bone.

- ActiveFlow™ Technology - through the guide irrigation
- The drill spins, ActiveFlow™ gets into action and the water flows... It is THAT simple!
- Delivers the coolant from the hand-piece directly to the surgical site and prevent bone heating.

Guided Surgery Accessories Kit - RS Implants

Adin Guide implant Insertion Kits are specific to standard Internal Hex implant platform type and features implant insertion tools for implant placement by hand, ratchet or hand-piece through the guide:

- Ergonomically designed placement driver.
- Wrench ratchet.
- Fixture mounts for use with mount-less implants.
- Drills for anchoring screws, to fix the stent on the patient's jaw.
- Extensions tools.

Why Choose ADIN With "Adin Guide"?

Adin's guided surgical kits were developed with both dentists and patients in mind.

The innovative kits, featuring intelligent and easy to follow layouts along containing self-centering drills with built-in stoppers, allow for simple, safe and fast dental Implant placement procedures.

ActiveFlow™ technology ensures through the guide irrigation and may reduce the possibility for bone-heating throughout the procedure. some prefer flapless implant placement surgeries since it is less invasive which results with less pain and suffering. some benefit from better spacing and angulation of implants stress-free procedures.

Both, using Adin Guide System, will enjoy superior esthetic and more natural functionality outcomes, and long-term success.

GSK001 Drills Kit

Kit Contents:

GS5055 Tissue Punch 5.0mmD, S-5.5

GS0625 Pilot Drill S-5.5, 2.5/1.8mmDx6.0mmL

GS0825 Drill S-5.5, 2.5/1.8mmDx8.0mmL

GS1025 Drill S-5.5, 2.5/1.8mmDx10.0mmL

GS1125 Drill S-5.5, 2.5/1.8mmDx11.5mmL

GS1325 Drill S-5.5, 2.5/1.8mmDx13.0mmL

GS1625 Drill S-5.5, 2.5/1.8mmDx16.0mmL

GS0638 Drill S-5.5, 3.85/3.2mmDx6.25mmL

GS0838 Drill S-5.5, 3.85/3.2mmDx8.0mmL

GS1038 Drill S-5.5, 3.85/3.2mmDx10.0mmL

GS1138 Drill S-5.5, 3.85/3.2mmDx11.5mmL

GS1338 Drill S-5.5, 3.85/3.2mmDx13.0mmL
